

## 1. Preparación y sincronización de la rama

activity Se clonó el repositorio remoto desde GitHub usando git clone para obtener la última versión de todas las ramas. Inicialmente en la rama main, se cambió a la rama activity con git checkout activity. Luego, para asegurar que estuviera alineada con la rama qa y evitar conflictos, se ejecutó git fetch y git rebase origin/qa. Finalmente, se subió la rama actualizada al repositorio remoto con git push origin activity

## 2. Creación y fusión del Pull Request en GitHub

Como parte de la serie de pasos para realizar el Merge Request, desde la interfaz web de GitHub se creó un Pull Request seleccionando como base la rama qa y como compare la rama activity, añadiendo una breve descripción del propósito de la fusión.

Posteriormente, tras revisar y validar los cambios propuestos, se aprobó y completó la integración utilizando la opción Merge pull request, incorporando de forma definitiva los cambios de activity en qa.

### 3. Sincronización de qa en local

Finalmente, se actualizó el repositorio local para reflejar los cambios realizados en qa usando `git checkout qa` y `git pull origin qa`

```

Jhampier santos@LAPTOP-TEHPOLTA MINGW64 ~/ADSO-2899747-Jhampier (activity)
$ git checkout qa
branch 'qa' set up to track 'origin/qa'.
Switched to a new branch 'qa'
